

Palliative Care Resources Inventory

This inventory represents a variety of key palliative care resources compiled by CERAH that are useful to health care providers, informal and formal caregivers, health care administrators, researchers, and others. This information was accurate as of March 2022 and will be reviewed/updated biannually. We welcome contributions to this listing. For more information or to provide resource updates or additions, please contact cerah@lakeheadu.ca

<p>A model to guide hospice palliative care: based on national principles and norms of practice https://www.chpca.ca/wp-content/uploads/2019/12/norms-of-practice-eng-web.pdf A Model to Guide Hospice Palliative Care: Based on National Principles and Norms of Practice (the Norms) was first released in 2002. Over more than ten years, the field has enthusiastically embraced the norms, using them to develop programs that provide high quality comprehensive person and family-centred hospice palliative care. The Norms have been revised to emphasize those aspects of care and organization that are unique to hospice palliative care.</p> <p>Canadian Hospice Palliative Care Association (2013) https://www.chpca.ca</p>		<p>Informal & Formal Caregivers, General Public, Health Care Administrators, Health Care Providers</p>

<p>Advancing high quality, high value hospice palliative care in Ontario: a declaration of partnership and commitment to action https://www.hpco.ca/wp-content/uploads/Declaration-Final-EN.pdf</p> <p>In Canada, most people die as the result of an advanced chronic disease. Yet despite this need, it has been estimated that only 16-30 per cent of Canadians have access to formal palliative care and support appropriate to their needs. The partners of this Declaration have come together to set forth a new vision and a new plan for palliative care in Ontario. Through this plan, we can provide better care for Ontarians at end of life while we better manage our health care resources over time.</p> <p>Local Health Integration Networks & Quality Hospice Palliative Care Coalition of Ontario (2010) http://hpco.ca/qhpcco/</p>	<p>Ameliorer la qualite et la valeur des soins palliatifs en Ontario - Declaration de partenariat et d'engagement a l'action https://www.hpco.ca/wp-content/uploads/D%C3%A9claration-Finale-FR.pdf</p> <p>Local Health Integration Networks & Quality Hospice Palliative Care Coalition of Ontario (2010) http://hpco.ca/qhpcco/</p>	<p>Health Care Administrators, Health Care Providers</p>
<p>Assessment and Management of Pain (Third Edition) Best Practice Guideline https://rnao.ca/sites/rnao-ca/files/AssessAndManagementOfPain2014.pdf</p> <p>This nursing best practice guideline is a comprehensive document, providing resources for evidence-based nursing practice and should be considered a tool, or template, intended to enhance decision making for individualized care. The guideline is intended to be reviewed and applied in accordance with both the needs of individual organizations or practice settings and the needs and wishes of the client/patient, their family and caregivers being cared for by the interprofessional team. In addition, the guideline provides an overview of appropriate structures and supports for providing the best possible evidence-based care.</p> <p>RNAO (Registered Nurses' Association of Ontario) https://rnao.ca</p>		<p>Registered Nurses, Health Care Administrators, Health Care Providers</p>

<p>Evidence-based series #19-2: provider-patient communication https://www.cancercareontario.ca/en/guidelines-advice/types-of-cancer/2256</p> <p>What aspects of provider-patient communication, at critical points of care, have an impact on clinical outcomes of cancer patients? The critical points of care of interest are diagnosis, recurrence, identification of metastases, and progressive disease. Outcomes of interest include psychosocial or emotional distress in patients (e.g., anxiety, depression), patient satisfaction, patient quality of life, and patient recall or understanding of information communicated by providers. The components of provider-patient communication that are the focus of this report are communication styles and approach.</p> <p>Cancer Care Ontario https://cancercareontario.ca</p>		<p>Health Care Administrators, Health Care Providers</p>
<p>Health care for people approaching the end of life: an evidentiary framework. Ontario Health Technology Assessment Series 14 (14): 1-45 https://www.hqontario.ca/Portals/0/Documents/evidence/reports/evidentiary-framework-eol-health-care-1411-en.pdf</p> <p>This mega-analysis provides an evidentiary platform to inform public policy, with the goal of improving Ontario's approach to EoL care. The target population was adults (18 years of age and over) with advanced disease who are not expected to stabilize or recover from their condition. The overall objective was to compile a clinical and economic evidence base to guide decisions about interventions that may optimize EoL care, either by improving patient outcomes or promoting system efficiencies. This work will contribute to provincial programs and strategies aimed at better EoL care for people in Ontario.</p> <p>Health Quality Ontario https://hqontario.ca</p>		<p>Health Care Administrators, Health Care Providers</p>
